For plain blinds (*with no illustration printed on*) deduct 20%

- These prices are based on recess widths, not fabric widths. To calculate the price, follow the measuring instructions.
- Carriage will be charged at £8.50 per order but there will be an extra charge for items posted overseas, to the Channel Islands, Southern Ireland and the Scottish Isles. Please ask for a quotation.

- Please allow 3 weeks from date of order to delivery.
- Personal shoppers are always welcome at our workshop but please allow 3 weeks between ordering and collection.

Blinds will be supplied with a spring roller mechanism and central pull cord, or a 'Sidewinder' which offers the following benefits.

- ◆ A sidewinder works on a controlled ratchet principle rather than the traditional spring loading.
- ◆ It enables you to raise or lower the blind with ease and precision.
- ◆ Your blind stays exactly in position where you require.
- ◆ No central pull cord required. The control bead chain hangs out of the way at the side.
- ◆ The sidewinder fitting does not increase the space taken by the fittings.

Only £6 extra

We do recommend a 'sidewinder' mechanism on large blinds.
